

Formatting via CSS: The Short Story (simplified format)

Simplifying a manuscript is typical for informal casual presentation

by Penfirstname Penlastname

*This is an **epigraph**. Some stories, parts, chapters, and even scenes will kick off with an epigraph.*

*A dreamer is one who can only find his way by
moonlight, and his
punishment is that he sees the dawn before the rest of the
world.*

Oscar Wilde, 1888

This document is an example of a typical short story. It has no parts or chapters, just scenes and the title page exists, but is rendered invisible by the 'simple flag. I will create a formal version of my manuscript, then add the 'simple' flag in the classes for #manuscript, generate a PDF or HTML version and share that with folks to review. When I am ready, I remove the simple flag and create the manuscript.
