

This document is an example of a story snippet. It has no parts or chapters, just scenes. AND It doesn't even have the metadata info: no contact info, nor facts.

Notice the auto-inserted [dinkuses](#) between the scenes. But I changed the -30- marker from its default of *The End* to ●●●. I just felt that *The End* was a bit absolute for a snippet.

This is a scene. This is a scene. This is a scene. This is a scene. This is a scene. This is a scene. This is a scene. This is a scene.
